

Weekly Report for 2015/10/26-2015/11/01

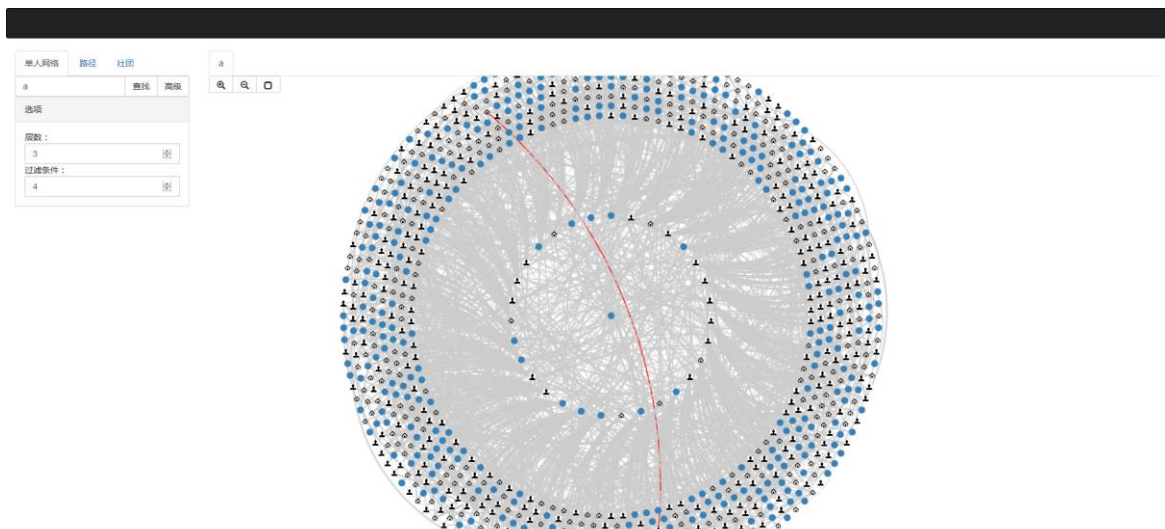

Guo Fangzhou

Progress

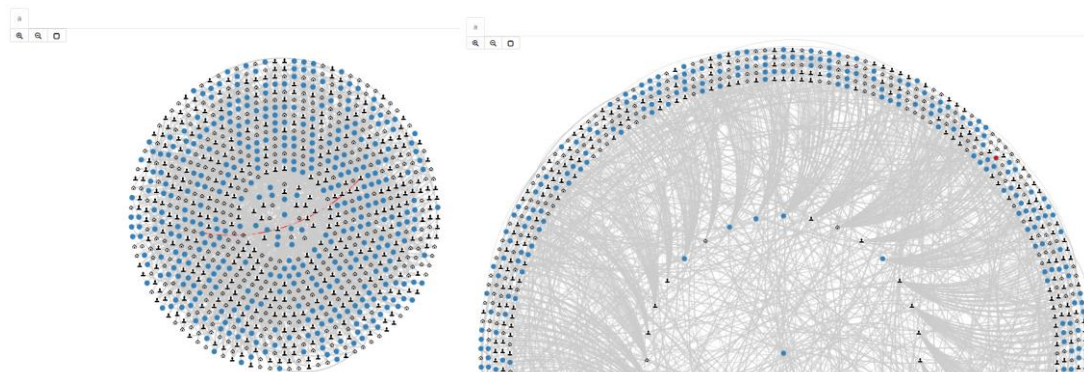

1. TCPTree Project

2. Large Graph Visualization

Current interface of the system:

Scale:

Heterogeneous nodes are supported:

3. Vis 2016 Paper

I made the plan of the project:

1. Calculate the feature of the data
2. Detect the special structures in networks
3. Calculate structural holes
4. Network flow and information diffusion

Plan

1. TCPTree Project

2. Large Graph

Refine the visualization of ego network and finish the interaction.

3. Vis 2016 Paper

Read papers and see how to calculate the structural holes
